BioSystems, Volume 34 (1995)

Biological and Evolutionary Information Processing — A Festschrift for Hans J. Bremermann

Hans J. Bremermann: A pioneer in mathematical biology
R.W. Anderson, M. Conrad (Irvine, CA; Detroit, MI) 1
Elements of a systematic search in animal behavior and model simulations
W. Alt (Bonn, Germany) 11
Partitioning non-linearities in the response of honey bee olfactory receptor neurons to binary odors
W.M. Getz, R.P. Akers (Berkeley, CA) 27
Return to equilibrium — or why we may be losing information from our physiologic experiments
S. Zietz (Philadelphia, PA) 41
Network thermodynamics revisited
E.R. Lewis (Berkeley, CA) 47
Intercellular signaling in neuronal-glial networks
M.S. Cooper (Seattle, WA) 65
On the maternal transmission of immunity: A 'molecular attention' hypothesis
R.W. Anderson (Irvine, CA) 87
Characterization of prediction in the primate visual smooth pursuit system
D.C. Deno, W.F. Crandall, K. Sherman, E.L. Keller (Berkeley, CA; San Francisco, CA) 107
Parameter identification of a neurological control model for the pathological head movements of cerebellar patients
C.F. Ramos, W.H. Zangemeister, J. Dee (Berkeley, CA; Hamburg, Germany) 129
The role of dehydro-Alanine in the design of peptides
S. Bhatnagar, G. Subba Rao, T.P. Singh (New Delhi, India) 143
Constantly 'awake' brain and Bremermann's question
R.K. Mishra (New Delhi, India; Kaiserslautern, Germany) 149
Evolutionary credit apportionment and its application to time-dependent neural processing
R. Smalz, M. Conrad (Detroit, MI) 161
Computing with dynamic attractors in neural networks
M.W. Hirsch, B. Baird (Berkeley, CA) 173
A shape representation for computer vision based on differential topology
A.P. Blicher (Oakland, CA) 197
A precondition prover for analogy
W.W. Bledsoe (Austin, TX) 225
Wavelet variations on the Shannon sampling theorem
H. Bray, K. McCormick, R.O. Wells, X. Zhou (Houston, TX) 249
Analytic representation of compactly supported wavelets
H.L. Resnikoff (Cambridge, MA) 259
